

# LUKE KARLOVICH

FULL STACK WEB DEVELOPER

## ABOUT

Full-Stack web developer with a background in healthcare applications. Healthcare, like technology, is constantly evolving which has allowed me to adapt to constant changes and learn new material quickly. My favorite part of working in healthcare has been the technical aspect and ensuring different software and interfaces are functioning proficiently. I enrolled in a Full-Stack program through University of Denver to provide myself with the skills in Javascript, React and Node to make applications of my own. I enjoy building dynamic and interactive websites and discovering new technology. Looking for a junior developer position, in a team setting within a progressive and innovative company.

## ABOUT

Hiking | Snowboarding | Dog Parks  
Mountain Biking | Movies

## EDUCATION

### FULL STACK WEB DEVELOPMENT

University of Denver | Denver | 2018 - 2019

### BACHELOR OF ARTS

University of Colorado | Boulder | 2012 - 2016

## EXPERIENCE

### LABORATORY TECHNICIAN

Boulder Community Hospital | Boulder | 2016-2018

Run and report test results on multiple healthcare applications. Assist patients and medical professionals with any electronic medical record software difficulties as well as any other customer service related problems.

### MEDICAL SCRIBE

Cornerstone Orthopedics | Louisville | 2016

Complete patient charting for physicians during procedures and in clinic. Upload and troubleshoot MRI applications.

## APPLICATIONS

**TakeaHike** | <https://luka2457.github.io/TakeaHike>

This application utilizes two API's and Firebase to report local hiking trails and real time weather with CSS grid styling.

**RYTFA** | <https://github.com/luka2457/rytfa>

Converted a Ruby on Rails website to an exact static replica with the use of jQuery and Bootstrap. Application is deployed and hosted through Amazon Web Services.

**PlatePlanner** | <https://hidden-ocean-42752.herokuapp.com>

A full stack application build on node that allows users to search and save recipes as well as ingredients to their profile with the use of MySQL database.
